PROFESSIONAL SUMMARY

Cloud and DevOps Engineer with hands-on experience building, deploying, automating and troubleshooting cloud-native systems across AWS, Docker, Kubernetes, Terraform, Linux and CI/CD. Built Minerva Sentinel, a hybrid-cloud monitoring platform with infrastructure telemetry, incident management, secure AWS STS/IAM integration and containerized services. Strong foundation in networking, PostgreSQL, GitHub Actions and production-oriented cloud infrastructure. Targeting Cloud Engineer, DevOps Engineer, Junior DevOps Engineer and Cloud Support Engineer roles.

TECHNICAL SKILLS

Cloud

AWS EC2, S3, RDS, IAM, VPC, ECR, EKS, CloudFront, ACM, STS, CloudWatch
Azure: Virtual Machines, VNet, Resource Groups, Storage Accounts, Azure Monitor

DevOps & IaC

Docker, Docker Compose, Kubernetes, Minikube, Terraform, GitHub Actions, OIDC

Systems

Linux, Ubuntu, WSL, Bash, SSH, networking, troubleshooting

Application & Data

Node.js, Express, React, Vite, PostgreSQL, Socket.IO, REST APIs, Git/GitHub
Monitoring, Grafana, metrics, logs, dashboards, alerting, observability

PROFESSIONAL EXPERIENCE

Junior Cloud & Network Engineer | WHINZET Digital ID Limited

Jan 2025 - Oct 2025

Industrial Training Placement

- Supported cloud and network engineering activities across infrastructure troubleshooting, deployment workflows and day-to-day technical operations.
- Worked with Linux-based environments, network connectivity and system troubleshooting while building practical cloud support experience.
- Assisted with diagnosing infrastructure issues and documenting repeatable technical steps for reliable operational support.

SELECTED CLOUD & DEVOPS PROJECTS

Minerva Sentinel | Hybrid Cloud Monitoring Platform

AWS | Docker | Kubernetes | React | Node.js | PostgreSQL | GitHub Actions

- Designed and built a hybrid-cloud monitoring platform for hosts, services, containers, metrics, logs, alerts and operational incidents.
- Implemented database-backed incident acknowledgement, resolution and event timelines, plus host-agent telemetry and real-time UI updates.
- Built secure AWS account integration using IAM role ARNs, external IDs and STS AssumeRole rather than storing long-lived access keys.
- Containerized application services and built CI/CD workflows using GitHub Actions, AWS OIDC and Amazon ECR; tested workloads on Amazon EKS.

AWS Infrastructure with Terraform | Infrastructure as Code

Terraform | AWS VPC | EC2 | RDS | ALB | Auto Scaling | ECR | Secrets Manager

- Provisioned production-style AWS infrastructure with Terraform, including networking, compute, managed PostgreSQL, load balancing and Auto Scaling components.
- Worked with IAM roles/policies, ECR images, Secrets Manager, S3/CloudFront, CloudWatch and GitHub Actions OIDC for secure delivery workflows.

Kubernetes & Amazon EKS Lab | Container Orchestration

Kubernetes | Amazon EKS | ECR | RDS | kubectl

- Deployed container workloads from Amazon ECR to EKS and practiced Kubernetes Deployments, ReplicaSets, Pods, namespaces and service configuration.
- Diagnosed application-to-database connectivity issues caused by localhost-based environment configuration and worked toward RDS-backed deployment settings.

Node.js Docker Application | Containerization

Docker | Node.js | Linux | Docker Hub | Git

- Containerized a Node.js application, published a reusable Docker image and validated local container networking and port exposure.

EDUCATION

M.Sc. Computer Science | Wesley University, Ondo

2027 - Expected 2028

In Progress

B.Sc. (Hons) Computer Science | Wesley University, Ondo

2023 - 2026

CERTIFICATIONS & TRAINING

Cloud Computing & DevOps | TechCrush

Jul 2026 - Sep 2026

Completed - Certificate received

Cloud Computing Program | TechSphere Academy

Oct 2026 - Jan 2027

Enrolled
